

PROjuice

Real fruit energy. Serious protein.

One-page business model summary for a fruit-protein beverage launch.

Problem

- Most protein drinks taste chalky or artificial.
- Juice and smoothies often lack enough protein for recovery.
- Busy customers need fast fuel between class, training and work.

Solution

- A chilled fruit-protein drink with 20g protein.
- Three bright flavours that feel refreshing, not heavy.
- Ready-to-go bottles for gym bags, fridges and lunch breaks.

Launch Targets

2,340 bottles by Sep 30, 2026 | 5 repeat stockists | 35% repeat purchase rate

Target Market

- Active students, gym users and young professionals aged 16-30
- People who want convenient breakfast, recovery or snack options
- Health-aware buyers who still care about taste and design

Existing Alternatives

- RTD protein shakes
- Smoothie and juice bars
- Homemade protein smoothies

Unique Value Proposition

- Real fruit energy. Serious protein.
- PROjuice gives customers the freshness of juice and the function of a protein drink in one bottle.

Sales Channels

- School and campus pop-ups
- Gym and cafe fridges
- Weekend markets
- Website and Instagram pre-orders

Costs

- Variable cost per bottle: NZD 2.45
- Launch marketing budget: NZD 655
- Chilled transport, sampling and small-batch production overhead

Competitive Advantage

- Fruit-first taste positioning
- Lower-waste fruit sourcing story
- Strong visual branding for social sharing
- Fast local batch production and community access

Revenue Streams

- Single bottle sales at NZD 6.50
- 3-pack bundles at NZD 17.50
- Wholesale cases to stockists
- Event catering and launch tastings
